

Katrin Inclusive Dispensers

Designed for everyone

20
25

DISPENSERS FOR EVERYONE. EVERYWHERE.

Our dispensers are designed with the majority of users in mind and they focus on functionality. They are simple and ergonomic to use regardless of each person's physical capability. Maintaining the dispensers is simple thanks to their well-planned design and innovative features that simplify the daily work of service staff.

We bring well-being, care and functionality to all hygiene facilities in offices, hotels and restaurants, healthcare, industry, schools and other public spaces. We offer hygienic solutions for all needs.

Choose between white and black

Our series of dispensers encompass a well thought out range of products that are suitable for all toilets and hygiene facilities at all workplaces. Whether you choose white or black dispensers, you will receive a good looking, well-functioning product. Together with our tissue paper and other accessories, it is easy to choose the right hygiene solution for your particular needs.

Focus on the user

The dispensers have been designed in cooperation with industry experts and many different end users. With the help of interviews, observation and laboratory tests, we have collected valuable information to find sustainable and useful solutions for all kinds of hygiene facilities.

Unique features, less hassle

Our main strategy is to make our dispensers as ergonomic and user-friendly as possible. For example, the soap dispensers are marked with braille to simplify their use by those with impaired vision. The soap dispenser's full-face push cover makes it easy to use. Transparent sides make it easy for service staff to see when it is time to fill the dispenser with paper and soap, which means that the dispensers are always well-filled.

MAKE A SMART DECISION.

We make daily life healthier, simpler and kinder to the environment by making sure that our washroom solutions are hygienic, easy to use and sustainable. When you choose Katrin, you know you are making a smart decision. Katrin is clean & green!

Did you know that 80% of all infections are spread via hands?*

Paper is the most hygienic product for drying your hands. It is only used once, so there is no risk of spreading infection further. The hands are also cleaned in a mechanical sense with paper towels. You can use our paper towel dispensers to feed one sheet at a time, which means that you only touch the sheet which is used. The size of the sheets has also been adapted for optimal drying. According to the "Toilet Report" from 2024, paper is also clearly the most popular hand drying method**.

Make sure you have the right hygiene solution

To us, the toilet is the most important room in the world and everyone wins if the toilet is equipped with the right paper, soap, dispensers and waste bins with the right capacity. Users can easily maintain good hand hygiene, and the service staff will save time because the toilet is simple to keep clean and fresh. The right solution will also minimise consumption and save resources.

* Source: BZgA (the Federal Centre for Health Education in Germany) 2016

** The Toilet Report is a study performed by an external market research company commissioned by Metsä Tissue to gain insight about end user behaviour and preferences concerning public toilets.

We use tissue paper made of fresh fibres

Paper produced with fresh fibres is cleaner than paper made with recycled fibres because there is no risk of any remaining contamination from previous use. The tissue paper also has longer and stronger fibres, which is why they are much better at absorbing fluid. This means that the ability of the paper to mechanically remove bacteria increases and the user is able to dry their hands more quickly. The risk of bacterial growth on the hands is reduced.

The paper is also softer and gentler on the skin. Choosing tissue paper made of fresh fibres can be an excellent way to maintain the highest possible level of hygiene and minimise the risk of spreading disease.

GREEN

Sustainable raw materials straight from the forest

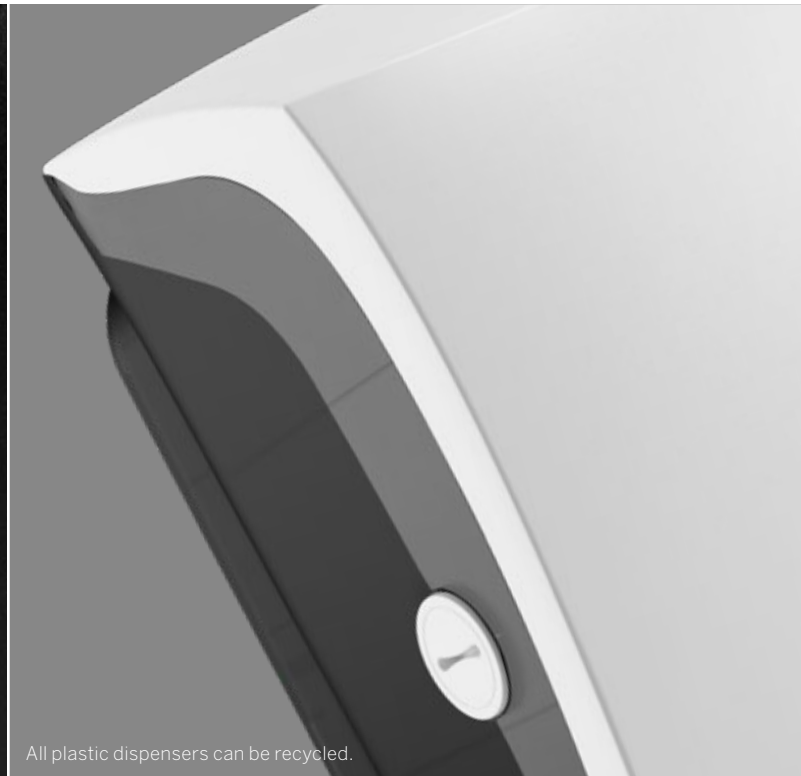

We take in to account all EU legislation in relation to our raw materials. Our main source of raw material is wood fibre from sustainably maintained forests. All Metsä Tissue production sites are certified according to PEFC* and FSC®** standards to ensure legal and sustainable use of forests and traceability of wood-based raw materials. We also take responsibility for regrowth by planting four new trees for every harvested tree. Biological diversity and diverse use of forests are important aspects to consider if we want to keep our forests vital and preserve them for future generations.

* PEFC/04-31-0596

** FSC® C005927

The black plastic parts in dispensers are manufactured with recycled plastic.

All plastic dispensers can be recycled.

Produced near the market

Our tissue mills are located close to the markets and our customers. In this way, we keep transport routes short and at the same time avoid intra-group relocations. We pack our products carefully and always aim to transport less air and more product. We also have a goal to make our paper mills free from fossil fuels by 2030.

The right hygiene solution saves resources

Our system solutions reduce consumption. You don't need to fill dispensers or empty waste bins as often. Changing from folded paper tissues to system paper towels makes it possible to reduce consumption by up to 40%*. Changing from normal liquid soap to foam soap can mean using up to 35%* less soap.

Recycled plastic

We are always developing new ways of minimising our use of plastic. For example, all of our black parts in our black dispensers are made with recycled plastic. The black detailing on the white dispensers and the plastic plugs in the system rolls are also made of recycled plastic. In addition, all our plastic packaging with the "Green Pack" logo is made from at least 30% recycled material. We are working to offer fossil-free packaging options by 2030.

Everyone is a winner when you change to Katrin Plus

Tissue paper produced with fresh fibres uses less resources at the production site and has a lower carbon dioxide footprint through the whole lifecycle; from the forest and production to the user and finally to energy recycling. In other words, you do not need to compromise on good quality, product safety or sustainability when you choose products made of new fibres.

* Source: This calculation is made using a consumption and CO₂ calculator, and it is based on a company with 100 employees using the washroom 3 times a day.

CAPACITY AND PERFORMANCE.

KATRIN HAND TOWEL DISPENSER XL offers new innovative features to enhance efficiency, flexibility, and performance. The dispenser is the ideal choice for high-traffic areas

where high performance is needed, making it a perfect fit for locations such as large office buildings, shopping centres and sports arenas for example.

(code 85040)

The easily adjusted settings allow you to load the dispenser with all widths of folded hand towels.

Easy to load thanks to flexible panels that keep the towels in place during loading.

A universal dispenser solution in which all folded hand towels fit. This provides a long lasting dispenser solution.

PERSONALITY AND FUNCTION.

KATRIN HAND TOWEL DISPENSER M fits perfectly in medium-traffic areas such as smaller offices or restaurants. The dispenser's design and features help you to create the special sense of comfort that you want your guests to feel. You do not need to compromise.

It fits perfectly in medium-traffic areas such as smaller offices or restaurants.

Transparent sides to see at a glance if it needs refilling.

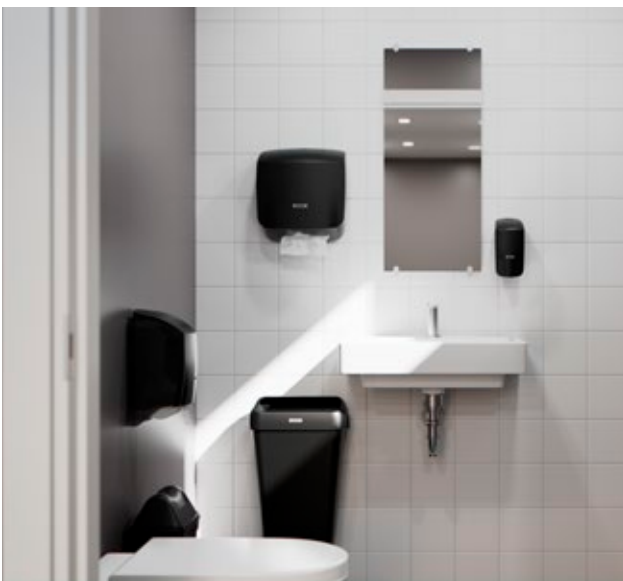

Supports hold the paper in place and simplify the filling procedure.

FUNCTIONALITY IN SMALL PLACES.

KATRIN HAND TOWEL DISPENSER S is a handy and functional dispenser designed for smaller spaces. It fits perfect in areas with low traffic and in narrow spaces, e.g. cafés or doctors' practices.

It fits perfect in areas with low traffic and in narrow spaces.

The lid opens downwards for easy filling in narrow spaces.

WASHROOMS YOU CAN TRUST.

KATRIN SYSTEM HAND TOWEL ROLL DISPENSER is functional and reliable. It has a very high capacity. Depending on the paper quality, it contains 392 to 784 sheets each time it is loaded. The dispenser is also designed to minimise paper consumption. It is easy to use with a clearly defined push lever which shows where you can feed a new sheet of paper if no paper is visible hanging down.

KATRIN HYBRID SYSTEM HAND TOWEL ROLL DISPENSER is equipped with a sensor function, enabling particularly hygienic and touch-free dispensing. It offers comprehensive flexible adjustment options to easily adapt to individual needs, such as sheet length, paper feed, time delay, and sensor sensitivity. Thanks to its hybrid functionality, the dispenser remains operational even when the batteries are empty, ensuring uninterrupted operation until the batteries are replaced.

Easy to feed paper by pressing the PUSH button. Controlled consumption.

Comprehensive adjustment options to easily adapt to individual needs.

Capacity is a decisive factor for washrooms that are used around the clock, for example in hospitals and sports centres, because paper always needs to be available whenever someone visits the hygiene facilities.

Paper quality and paper capacity are important factors for washrooms with many users and high expectations, for example at a theatre, airport or conference centre. Our tissue paper is of such good quality that one sheet can be sufficient. All of them are labelled with the EU Ecolabel which is good for you and good for the environment.

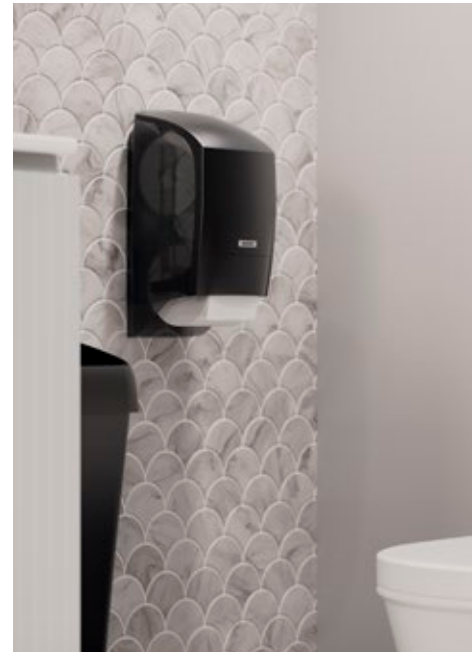

The risk of infection when using paper towels is minimal. You only touch the sheet you use.

Reliable construction, smooth functionality.

High capacity and easily accessible paper.

The dispenser has space for two toilet rolls. When one roll runs out, the other will take its place automatically.

Dispenser with core catcher (inner roll collector).

The dispenser can be filled with the second roll while the first one is still in use. This means that there will always be toilet paper available.

KATRIN SYSTEM TOILET PAPER DISPENSER is designed to be simple to maintain, reliable in use and cost-effective. There are two versions of the dispenser: with or without a core catcher. Despite the small casing the dispenser has space for two rolls of toilet paper which equals 1,600 sheets

of paper. You can always be sure that there will be enough toilet paper, even though there is a lot of activity and many users at the same time.

Easy to fill. The same dispenser can be used for foam and liquid soap, shower gel, hand sanitizer or toilet seat sanitizing foam.

The dispenser is available in two colours and sizes: 1,000 ml and 500 ml.

A full-face push cover makes the dispenser easy to use. The dispenser is also marked with braille.

KATRIN SOAP DISPENSER has a classy simple design which helps your guests achieve excellent hand hygiene. Transparent sides make it easier for the service staff to see when it is time to fill the dispenser. We have different kinds of soap in our range, and all are marked with the EU Ecolabel

and the Nordic Ecolabel. Choose between liquid soap and foam soap, with or without perfume, and add a separate hand sanitizer, if needed. You can also place a dispenser with hand sanitizing gel by the entry and exit so users can ensure their hygiene after touching the door handle.

SIMPLE AND FLEXIBLE.

KATRIN CENTERFEED DISPENSER is available in two sizes. It has all of the features you expect incorporated in an appealing design. You can choose from a range of paper products to tailor the usage for your business. Our Katrin Centerfeed multi-purpose towel rolls meet the high

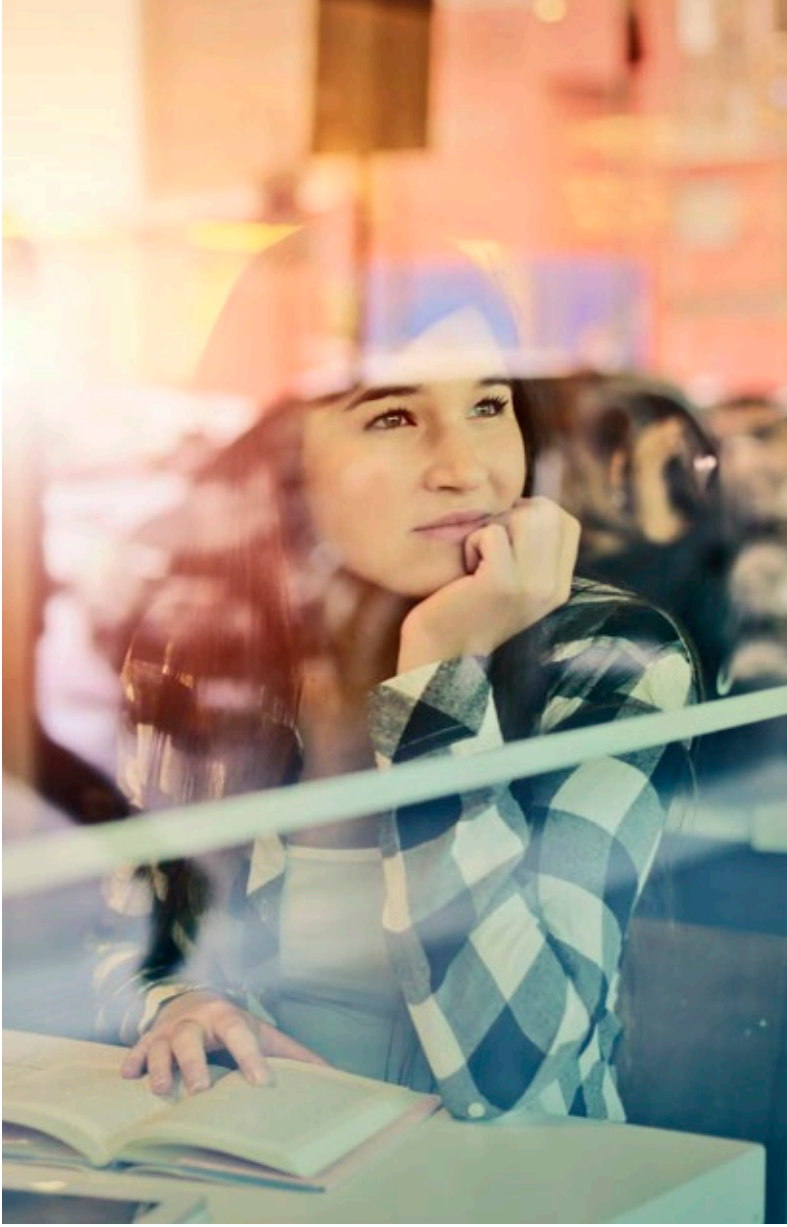

expectations of product performance and functionality for any workplace. They can be used as towels in public washrooms as well as for professional wiping in various industries as well as in food preparation.

Grabbing the paper is simple and can be done with one hand removing the quantity required. The paper-tearing teeth are curved inwards to prevent the risk of injury.

The dispenser is available in two sizes: S and M.

When you load the dispenser with new paper, the remaining roll can be hung on the folding holder.

The lock can be used with or without a key.

SMART AND EFFECTIVE.

KATRIN GIGANT TOILET PAPER DISPENSER for jumbo rolls is particularly suitable for areas with high frequency of use. For hotels and restaurants that not only care about style and elegance, but are also concerned about the satisfaction of their visitors, this simple and stylish dispenser is the ideal washroom solution. The Katrin Gigant toilet paper dispenser

blends into any environment, is easy to use and, thanks to the optional flip-out holder for remaining rolls, can be refilled with a new roll before the old one is used up. Details that are important for everyone – guests and staff. Visitors feel appreciated and are happy to come back.

Gigant toilet dispenser is available in two sizes: S and L.

Easy paper-tearing on all sides. The dispenser also has an automatic brake function so the paper cannot be pulled out so far that it ends up on the floor.

KATRIN HAND TOWEL DISPENSER XL

- Easy to load thanks to flexible panels that keep the towels in place during loading

THE RIGHT SOLUTION SAVES RESOURCES.

Choose paper, dispensers and accessories according to how many people use your toilet and the needs they have.

Begin by asking two questions:

1. How many people use the washroom?

Does it have many or only rather few users? Is it used constantly or does its usage peak at certain times? How many service intervals are needed?

2. What needs do the users have?

Do they have special demands regarding paper quality, i.e. high performance, environmentally friendly or extra hygienic paper?

Saving resources

The best solutions save the maximum amount of resources by minimising usage and hygiene risk. Paper, dispensers and accessories from Katrin perform at the highest level and give the best possible return.

EXTRA CARE

THE KATRIN BRAND

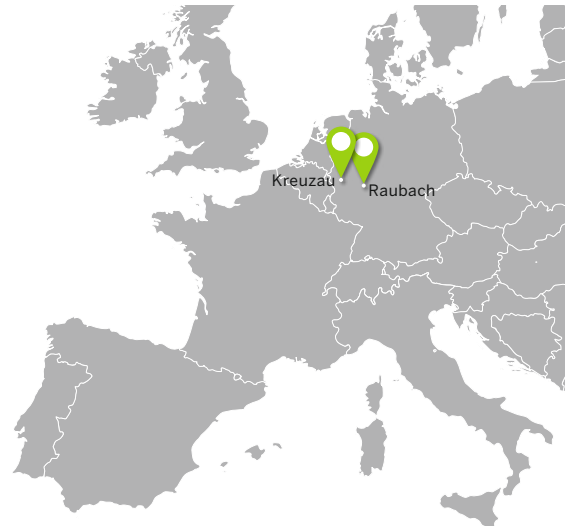

Katrin stands for well-being, care and functionality in hygiene facilities in healthcare, industry, restaurants, hotels, schools and other public washrooms.

At Katrin, we want to make our customers' lives simple and improve their business. We offer tailored solutions based on your needs.

Our aim is to give you the best possible conditions to offer your guests the best hygiene solution so that you can concentrate on business. Everyone is a winner when your toilet is equipped with the right paper, suitable dispensers and complementary accessories.

Users can maintain good hand hygiene and the service staff will save time because the toilet is simple to keep clean and fresh.
